

Spill Absorbent Clay Granules

Product Code: SE00350

Pack Quantity: 1

Spill Absorbent Clay Granules are a 100% natural mineral industrial absorbent, produced from attapulgite in the form of granules.

This product shows high absorption capacities, fireproof, it is easy to handle and transport.

Can be used both indoors and outdoors.

PRODUCT FEATURES

- 20L Bag
- Provides good balance and usability in every application
- Good absorbent performance
- Leaves surfaces safe, clean and dry
- Natural (No chemicals or modification)
- Lightweight product to transport and in use
- Fireproof
- Harmless to human, agriculture and animals

INSTRUCTIONS

1. Sprinkle the product on the spill until it is completely covered
2. Let it work for 3 minutes
3. Stir the granules to be sure they are in contact with all the liquid
4. Let it work for a further 3 minutes
5. Clean with a broom
6. The recovered product must follow the regulatory elimination circuits depending on their nature

TECHNICAL INFORMATION

PRODUCT INFORMATION

Colour	Light cream
Appearance	Fine granules
Packaging	20L Bag
Storage Conditions	Store in a dry place, protected from moisture
Shelf Life	5 Years from manufacturing date
Composition	Attapulgite

PHYSICO-CHEMICAL CHARACTERISTICS

	Specifications ¹
Moisture (%)	Max. 15.0
Bulk Density (g/l)	700-800
Water absorption ² (%)	Min. 100
Gasoil absorption ² (%)	Min. 70
Particle size distribution by dry sieving	
Residue on 6.30mm	Max. 5.0
Finer than 0.50mm	Max. 3.0
	Typical value ³
Water absorption ³ (%)	115
Gasoil absorption ³ (%)	80
